SUMMARY

Computer Science graduate (McMaster, 2026) focused on backend development with Java, Spring Boot, REST APIs, PostgreSQL, and JPA/Hibernate. Built and tested 30+ REST endpoints across Spring Boot projects using JUnit, with additional experience in Python, FastAPI, and React.

EDUCATION

McMaster University

Hamilton, ON

B.A.Sc. Computer Science

June 2026

- Provost's Honour Roll, Dean's Honour List
- Coursework: Data Structures & Algorithms, Databases & SQL, OOP & Design Patterns, Operating Systems
- Participated in Hack the North, Hack the 6ix, and MLH Local Hack Day

PROJECTS

Job Application Manager | *Java, Spring Boot, PostgreSQL, JPA/Hibernate, JUnit, Maven*

GitHub

- Built a Spring Boot REST API with 18 endpoints managing job applications, companies, interviews, and statuses
- Designed a normalized PostgreSQL schema with 6 tables using JPA/Hibernate, including indexes on frequently queried fields
- Implemented request validation, global exception handling, and 40+ JUnit tests achieving 80% test coverage
- Documented and tested REST APIs using Postman and Swagger

Stock Portfolio Tracker | *Java, Spring Boot, PostgreSQL, JUnit*

GitHub

- Built a portfolio management service with 14 REST endpoints tracking holdings, transactions, portfolio value, and investment performance
- Designed a relational PostgreSQL schema with 5 tables for portfolio and transaction management
- Implemented scheduled background jobs to refresh market data every 15 minutes and recalculate portfolio value
- Wrote 30+ JUnit tests covering portfolio calculations and core business logic

AI Customer Support Assistant | *Python, FastAPI, PostgreSQL, OpenAI*

GitHub

- Built a RAG-based customer support assistant using a custom knowledge base containing 25 documents
- Developed a FastAPI backend with PostgreSQL for storing application data and conversation history
- Integrated an LLM API to generate context-aware responses based on retrieved knowledge-base information

EXPERIENCE

Google Developer Student Clubs (GDSC) McMaster

Sep 2024 – Present

Developer Member

Hamilton, ON

- Helped run 5+ technical workshops on data structures, Python, LeetCode, and developer tools, with 20+ attendees per session
- Collaborated with Women in Engineering and other GDSC chapters to organize technical events and increase student participation

McMaster University

Jun 2024 – Aug 2025

Peer Programming Tutor

Hamilton, ON

- Provided one-on-one programming support in Python, C, Bash, and Linux to 10+ classmates
- Debugged student code and provided feedback on correctness, readability, and software development best practices

Paladin Security Group

Jun 2024 – Present

Security Officer (Casual)

Burlington, ON

- Monitor multi-camera CCTV systems and review footage to identify and verify incidents at Burlington Centre
- Document 50+ incidents and events in digital reports, communicating accurate information to supervisors and clients

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C/C++

Backend & Frameworks: Spring Boot, REST APIs, JPA/Hibernate, FastAPI, React

Databases: PostgreSQL

Testing & API Tools: JUnit, Unit Testing, Postman, Swagger

Developer Tools: Git, GitHub, Docker, Maven, Linux

Practices: Object-Oriented Programming, SOLID Principles, RESTful API Design
